How it works:

A return of 11% is paid every year for 3 years. At end of term your capital is returned in full.

If your investment is via pension then the payments will be made to your pension directly. We do not give pension advice, please consult with a suitably qualified professional.

Why it works:

The Power Forward Investment Bond is promoted by Prepaypower Limited. We specialise in the provision of prepay electricity meters in Ireland. We have achieved "Large Supplier Status" on the Irish Electricity Market as defined by the CER (Commission for Energy Regulation), we are therefore authorised to supply all market sectors.

Our target markets are the households who struggle to pay bills/are in arrears; and the landlord market. We make profits in two ways, from the sale of electricity and from rental of meters. We supply and install meters free of initial costs. This way we can reconnect people very quickly and painlessly. Customers then pay a monthly rent for the meters on a permanent basis. The meters become a profit centre for years to come.

The cost to supply and install are significant, but the rents cover the cost after about 2 years. We need investors to allow us to purchase and install meters for demand which is very high and growing all the time. Investors' funds allow us to grow the company's inherent profit and we reward investors accordingly. We are fully bonded members of the Single Electricity Market.

Please note: This investment does not require licensing, authorisation or registration with the Financial Regulator and as result, it is not covered by the Financial Regulator's requirement designed to protect customers or by a statutory compensation scheme.

Warning: The value of your pension investment can fall as well as rise. Past performance is not a reliable guide to future returns.
